You are not alone. Help is available.
Did You Know...

-1 in 5 women and 1 in 16 men are sexually assaulted while in college.

-Only 12% of college sexual assault victims report to the police.

-84% of female victims report being sexually assaulted during their first four semesters on campus.

-90% of campus sexual assaults are committed by perpetrators that the victim knows.

-Majority of undetected college rapists are serial perpetrators, committing an average of 6 rapes each.

Consent is a clear "yes" to sexual behavior. Sexual assault occurs in the absence of consent. Not saying "no" does not mean you have given consent.

Consent CANNOT be given if you are:

-Under the influence of alcohol or drugs

-Unconscious or incapacitated

-Threatened, forced, coerced, or manipulated into an act

-Not mentally capable due to illness or disability

Remember, consent is an ongoing process, not a one-time question. If you consent to sexual activity, you can change your mind at any time. Past consent does not mean future consent.

How to protect yourself...

-If attending a party or social gathering, never go alone. Show up with a group of friends and make it a priority to check in on a regular basis.

-Have a buddy system. This is the best way to make sure that you never end up with someone alone that makes you feel uncomfortable.

-Be aware of your surroundings. This is always helpful just in case if a bad situation were to occur.

-If you find yourself in a situation where you feel things are moving too fast, say no. Never let anyone pressure you into anything.

-Try not to leave any beverages unattended or accept drinks from someone that you do not know.
